669 Johnson Street, Kingston, ON K7L 2A7  
613-561-6679 – matthew.sherwood@student.sl.on.ca

---

## **Summary of Skills**

- Strong interpersonal skills in a group setting, discussing and problem solving and not afraid to ask for help when needed.
- Comfortable picking up a new programming language with some assistance.
- Comfortable using main web technologies such as Apex, Java, PHP, and JavaScript.
- Good at breaking down a larger problem and solving smaller issues, so tasks become manageable.

## **Work Experience**

### ***Salesforce Apex/LWC Developer***

St. Lawrence College, Kingston ON

May 2023-Currently Employed

- Learned Salesforce application creating orgs working within a sandbox environment, and production servers.
- Mainly worked on automation using apex, and created an application that allows the recruiting and marketing team to send information freely without having to mainly fill out forms.
- Worked with testing and integration for code deployment.

### ***PHP Web Developer Intern***

Elentra Consortium, Kingston, ON

May 2022-September 2022

- Collaborated with a group of experienced software developers to maintain and review Elentra consortium code bases in an agile environment.
- Was tasked bi-weekly to work or investigate reported bugs or additions that were to be made to the application.
- Worked mainly with PHP to debug and code solutions to the tickets I was assigned.

### ***IT Student Service Desk***

St. Lawrence College, Kingston, ON

September 2021-April 2022

- Answering emails and phone calls to assist students with difficulties with blackboard or other account/technical issues.
- Developed knowledge around solving tickets and escalating them to the proper people.
- Experience with troubleshooting issues with Students and faculty computers, so they can properly use SLC services on their devices.

### ***IT Security Assistant***

St. Lawrence College, Kingston, ON

July 2021-2021 Sept

- Organized spread sheets and contacted users who needed to be informed that their email was going to be converted into a shared mailbox.
- Answered questions that employees had about, how to access their group mailboxes.
- Determined if employees needed their bypass codes or if they could use DUO or an alternative method of two-factor authentication.

## **Education**

### ***Ontario Secondary School Diploma***

La Salle Secondary School, Kingston, ON

2015 - 2019

### ***Computer Programmer Analyst Advanced Diploma***

St. Lawrence College, Kingston, ON

2019 – present

- Graduation April 2024

## **Personal Projects**

- *Personal Website*

This website has information about me, my future projects, my resume, and a link to my git hub. It was created with html CSS grids, and some JavaScript.

- *Web Services*

This is a project where I test and play around with different types of web services using html, JavaScript, and JSON files.

- *Java Web Application*

Using Spring Boot I have created a basic pizza ordering web application using html and Java.
